## European Technical Assessment

**ETA-12/0523**  
**of 20/12/2017**

### General Part

**Technical Assessment Body issuing the European Technical Assessment**

Instytut Techniki Budowlanej

**Trade name of the construction product**

KOELNER

**Product family to which the construction product belongs**

Three-dimensional nailing plates

**Manufacturer**

RAWLPLUG S.A.  
ul. Kwidzyńska 6  
51-416 Wrocław, Poland

**Manufacturing plant**

Manufacturing Plant no. 19

**This European Technical Assessment contains**

38 pages including 2 Annexes which form an integral part of this Assessment

**This European Technical Assessment is issued in accordance with Regulation (EU) No 305/2011, on the basis of**

Guideline for European Technical Approval ETAG 015, Edition November 2012 "Three-dimensional nailing plates", used as European Assessment Document (EAD)

**This version replaces**

ETA-12/0523 issued on 26/06/2013

*This European Technical Assessment is issued by the Technical Assessment Body in its official language. Translations of this European Technical Assessment in other languages shall fully correspond to the original issued document and should be identified as such.*

*Communication of this European Technical Assessment, including transmission by electronic means, shall be in full. However, partial reproduction may be made, with the written consent of the issuing Technical Assessment Body. Any partial reproduction has to be identified as such.*

## Specific Part

### 1 Technical description of the product

The three-dimensional nailing plates KOELNER are one-piece, non-welded elements, made of galvanized steel sheet grade S250GD+Z275 according to EN 10346.

The range of the KOELNER three-dimensional nailing plates is given in Annex A. The characteristic material values, dimensions and tolerances of the three-dimensional nailing plates not indicated in that Annex shall correspond to the respective values laid down in the technical documentation of this European Technical Assessment. The dimension tolerances shall meet the requirements of EN 22768-1.

### 2 Specification of the intended use in accordance with the applicable European Assessment Document (EAD)

The KOELNER three-dimensional nailing plates are intended to be used for connecting the mutually perpendicular, load-bearing, solid timber elements, in side-grain to side grain configurations, in joints for which requirements for mechanical resistance and stability in the sense of the basic work requirement 1 of Regulation (EU) No 305/2011 shall be fulfilled.

Ring shank nails according to EN 14592 with the diameter of 4 mm and characteristic tensile capacity  $F_{ax,Rk}$  not less than 1,77 kN shall be used for connections made with the KOELNER three-dimensional nailing plates.

In respect of the requirements concerning corrosion resistance, KOELNER three-dimensional nailing plates are for use in timber structures subjected to the internal conditions defined by service classes 1 and 2 according to EN 1995-1-1 (Eurocode 5), in corrosion aggressiveness categories C1 and C2 according to EN ISO 12944-2, without action of acid gases or vapours.

The provisions made in this European Technical Assessment are based on an assumed working life of the three-dimensional nailing plates of 50 years. The indications given on the working life cannot be interpreted as a guarantee given by the manufacturer or the Technical Assessment Body, but should only be regarded as means for choosing the right products in relation to the expected economically reasonable working life of the works.

### 3 Performance of the product and references to the methods used for its assessment

#### 3.1 Mechanical resistance and stability (BWR 1)

##### 3.1.1 Strength

The characteristic load-carrying capacities of joints loaded according to static diagrams shown in Annex B, determined by tests carried out according to ETAG 015, clause 5.1.3, are given in Annex B. The characteristic load-carrying capacities of joints for other load directions shall be calculated on the basis of EN 1995-1-1

(Eurocode 5) or according to national regulations. The design values shall be determined according to EN 1995-1-1 (Eurocode 5).

**3.1.2 Stiffness**

No performance assessed.

**3.1.3 Ductility in cyclic testing**

No performance assessed.

**3.2 Safety in case of fire (BWR 2)**

**3.2.1 Reaction to fire**

The three dimensional nailing plates are classified in Class A1 of reaction to fire (non-combustible products) in accordance with EN 13501-1 and European Commission Decision 96/603/EC amended by European Commission Decision 2000/605/EC.

**3.2.2 Resistance to fire**

No performance assessed.

**3.3 Hygiene, health and the environment (BWR 3)**

Regarding the dangerous substances, there may be requirements applicable to the products falling within its scope (e.g. transposed European legislation and national laws, regulations and administrative provisions). In order to meet the provisions of the Construction Products Regulation, these requirements need also to be complied with, when and where they apply.

**3.4 Sustainable use of natural resources (BWR 7)**

No performance assessed.

**3.5 General aspects**

The KOELNER three-dimensional nailing plates durability and serviceability have been assessed satisfactory when used in conditions defined by service classes 1 and 2 according to EN 1995-1-1 (Eurocode 5). The installation instructions including special installation techniques and provisions for the qualification of the personnel are given in the manufacturer's technical documentation.

**3.6 Methods used for the assessment**

The assessment of three dimensional nailing plates for the declared intended use has been made in accordance with the ETAG 015 "*Three-dimensional nailing plates*".

**4 Assessment and verification of constancy of performance (AVPC) system applied, with reference to its legal base**

According to the Decision 97/638/EC of the European Commission the system 2+ of assessment and verification of constancy of performance (see Annex V to Regulation (EU) No 305/2011) applies.

**5      Technical details necessary for the implementation of the AVCP system, as provided for in the applicable European Assessment Document (EAD)**

Technical details necessary for the implementation of the AVCP system are laid down in the control plan which is deposited at Instytut Techniki Budowlanej.

For type testing the results of the tests performed as part of the assessment for the European Technical Assessment shall be used unless there are changes in the production line or plant. In such cases the necessary type testing has to be agreed between Instytut Techniki Budowlanej and the notified body.

Issued in Warsaw on 20/12/2017 by Instytut Techniki Budowlanej

Anna Panek, MSc

Deputy Director of ITB
